

SSDB-E4

RETROFIT DRY SEALS

- FOR QUICK CONVERSION FROM GLAND PACKING
- FOR WORN-OUT SHAFTS
- CAN TOLERATE 3.8mm SHAFT RUNOUT / ECCENTRICITY & OUT OF SQUARE PAD FLANGE
- LOW HEAD-ROOM REQUIRED
- CAN BE EASILY ADOPTED TO FIT ON ANY EXISTING PAD FLANGE
- STEAM STERILIZATION OPTION AVAILABLE

APPLICATIONS :

- PHARMA REACTORS
- FERMENTORS
- MULTIMILLS
- ROTOCON DRYERS

SSDB-E4 seals are dry running retrofit seals meant for quick conversion of old gland packed agitators. Because of stationary spring design it can tolerate out of square or uneven pad flange. Since there is no closely fitting sleeve, the seal can be installed easily on worn out shafts. SSDB-E4 seals can tolerate shaft run-outs upto 3.8mm TIR.
